Two woods, new and thousands of years old, enrich the new collection 2016 of **ZanusoLegno** (<http://www.zanusolegno.com/en/products/stoneoak/>): **StoneOak®** and **StoneElm®**, two new wood testimonials, expression of two essences, which hundreds of years ago sank into the ground for natural causes. Fortunately layers of clay have covered this precious material and preserved it to the present day. Now they emerge. With all their load of beauty and charm, vital and fascinating signs, an incentive to create shapes and products recalling archetypal forms for innovative and forward-looking applications.

- The name **StoneOak** (<http://www.zanusolegno.com/en/products/stoneoak/>)® expresses its uniqueness, in fact it derives from the texture and the colours of stone.
- **StoneOak®** the new 'truewood' natural and eco-friendly, makes the most exclusive projects really unique.
